

Slotted Letter Installation

Slotted letters come in two styles:

Slotted A (thermoformed in CAB) - any standard CAB color.

Slotted B (injection molded in CAB) - Black and Transparent Red

Note: While our Slotted B letters are similar to Wagner's letters, the letter slots and track are not identical.

Slot and required track spacing

Letter Size	Slot & Track Spacing
6"	5" on center
8"	7" on center
10"	7" on center

Slotted B Letter on Slotted track

Slotted A Letter on Slotted track

Installation

Slotted track is only available in clear acrylic: 8', 10', and 12' lengths. Install track with glue (adhesive) as shown above, or pre-drill holes and screw or pop-rivet to mounting surface.

Mechanical hands are designed to change Slotted letters. This mechanism is a long pole with a chain running on the inside that is fastened to the hand grabbers (as shown above). By pulling the chain, the hands close and physically "grab" letters that are installed on slotted track. The letters are then lifted off the track and pulled to the ground.
